The Ph.D. degree program in Biophysics at UC Davis draws upon a large and highly diverse body of faculty. Our students develop and employ advanced methods in their research, using state-of-the-art tools to measure physiochemical phenomena in biological systems. Our flexible curriculum is especially well suited for creative, independent-minded students. Davis is an ideal location for students, with a small-town college atmosphere, yet only a short distance from such popular attractions such as the Sierra Nevada Mountains, Lake Tahoe, Napa Valley, Yosemite, San Francisco and the Pacific Ocean. Learn more at bph.ucdavis.edu, including application instructions and deadlines.

UC Davis and the Biophysics program values student diversity and encourages students from disadvantaged backgrounds to apply to our program.
