

CBS BIOPHYSICS GRADUATE GROUP

WINTER QUARTER SEMINARS – Fridays, 2:10 p.m., Life Sciences 1022

JOANA PAULINO

National High Magnetic Field Lab, Florida

“Long-Term Order of Water in a Transmembrane Pore: Ultra-High Field NMR”

Friday, January 11, 2019

LUIS DE LA MAZA

Professor of Pathology, UC Irvine School of Medicine

“A Chlamydia Vaccine: Are We There Yet?”

Friday, January 18, 2019

MARK HUISING

Associate Professor, Department of Neurobiology, Physiology and Behavior, UC Davis

“Local Crosstalk Within Pancreatic Islets Controls Glucose Homeostasis”

Friday, January 25, 2019

ALLISON ZWINGENBERGER

Associate Professor, UC Davis School of Veterinary Medicine

“Imaging Pets with PET”

Friday, February 1, 2019

MARTIN LAWRENCE

Professor, Department of Chemistry and Biochemistry, Montana State University

“New Structural Paradigm for Viral Assembly and Genome Delivery”

Friday, February 15, 2019

JON SACK

Associate Professor, Department of Physiology and Membrane Biology, UC Davis School of Medicine

“Visualizing Endogenous Ion Channel Conformational Change”

Friday, February 22, 2019

HAO CHENG

Assistant Professor, Department of Animal Science, UC Davis

“Multiple-Trait and Parallelized Bayesian Linear Mixed Models with Mixture Priors for Whole-Genome Prediction”

Friday, March 1, 2019

ABHIJIT CHAUDHARI

Associate Professor of Radiology, UC Davis

“Translational Anato-Molecular in Vivo Imaging Biomarkers”

Friday, March 8, 2019
